

NATURA BABY

Telescopic Lift

Our design team has developed a safety bar with telescopic lift that lets the moms take their babies from the bed and put them back down comfortably.

We have also developed a module for moms to be closer to their babies that transforms into a bed when pulled out.

When the extra mattress is not purchased, this space can be used as a storage for toys or other belongings.

i Mattress size for both upper and lower beds are w:80 d:177 h:13cm. Other sizes do not fit.

As your baby grows up, the bed transforms into a child bed as seen in the photo with a simple assembly. The pull out bed continues to be used as a friend bed or storage area.

The bed can be used until the child becomes 12 years old with its transformed 80x180 size and two different night stands.

Çilek baby beds
have more storage area.

Shelf module at the
back of the drawers

The drawers are partitioned
to provide neat storage.

We have considered the demands of moms and covered the bed with a bedding set from side to side.
