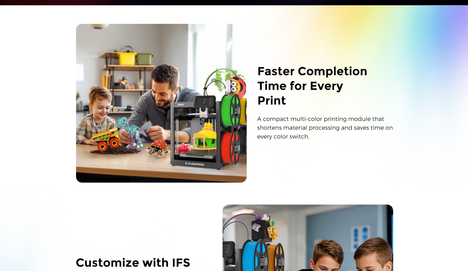
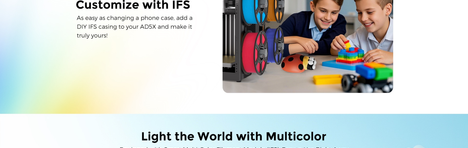
Your First Step into Easy 4-Color Printing

User-Friendly Operation | Multi-Material Printing | Fast Printing





Faster Completion Time for Every Print

A compact multi-color printing module that shortens material processing and saves time on every color switch.

Customize with IFS

As easy as changing a phone case, add a DIY IFS casing to your AD5X and make it truly yours!

Light the World with Multicolor

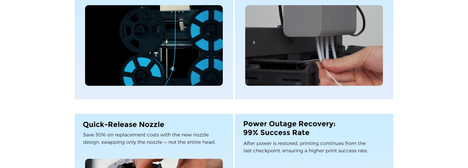
Equipped with Smart Multi-Color Filament Module (IFS). Easy to Use Right Away

Easy to Use

As simple as using a camera, the AD5X takes the experience of simple operation to the next level.

Automatic Filament Switching

When printing a single-color model, once one spool is used up, it automatically switches to the next spool. Print with peace of mind.

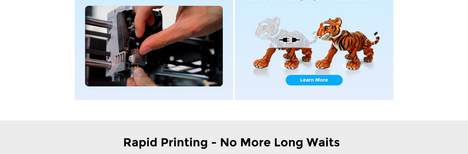


Unbox and Assemble in Three Easy Steps

Simply install the screen, filament holder, and multicolor printing module. All is done.

Quick-Release Nozzle

Save 50% on replacement costs with the new nozzle design, swapping only the nozzle — not the entire head.



Power Outage Recovery: 99% Success Rate

After power is restored, printing continues from the last checkpoint, ensuring a higher print success rate.

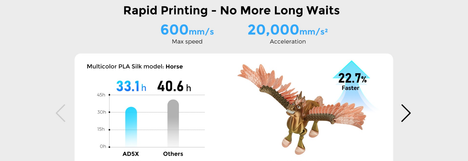
Multicolor PLA Silk model- **Horse**



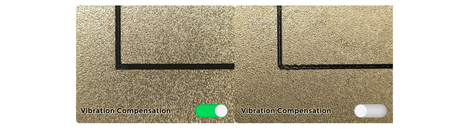
Print Time Comparison

Designed by @FlexFactory

Precision You Can Trust, Quality You Can See

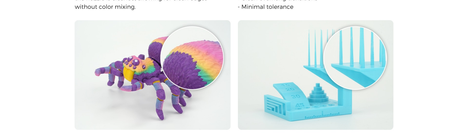
Consistent Printing Performance

- The classic CoreXY structure of the 5M series effectively reduces print vibration deviations, ensuring consistent detail in continuously printed identical models.



True Multicolor Printing: No Color Bleeding

- The CoreXY structure ensures precise movement positioning, and each time the material is switched, the nozzle is cleaned, allowing for clean edges without color mixing.



Printing Results: What You See Is What You Get

- Smooth surface transition
- Sharp peak formation
- Clean overhang transitions
- Minimal tolerance

To give you more filament compatibility and greater freedom

AD5X supports PLA/PLA PRO/HS PLA/PLA Matte/ PLA SILK/PLA PETG/PETG PRO/HS PETG/ASA, and is open to third-party brands.

Compact Design, Space-Saving

Four spools of filament arranged side by side, effectively reducing storage space and allowing for more flexible placement.

Packing List

3D Printer ×1	Filament 10g ×4	Power Cord ×1	After-sales Service Card ×1	IFS Connection Cable ×1	Quick Start Guide ×1
4-in-1 Cuide Tube ×1	Mounting Plate ×1	4-Color Module (IFS) ×1	Screw M3x6 ×4	Cable Clip ×1	Glue ×1
Display Screen ×1	Grease ×1	Spool Holder ×4	Diagonal pliers ×1	Phillips Screwdriver ×1	Allen Wrench Set ×1 Unclogging Pin Tool ×1
