

No language barriers – this is how it works

Translate entire website of a designer in CHROME (SAFARI see below)

On computers it works as follows:

- Open Chrome on your computer.
- Open the foreign language website, e.g. the website of a French designer.
- Click on "**Translate**" to the right of the address bar. .
- **Select the language** you want to translate into.
- The website will be translated in Chrome.

• On Androids, iPhones and iPads:

- open the Chrome app on your device .
- Open the foreign language web page.
- On **Androids** select the target language at the **bottom**, on **iPhones + iPads** at the **top**
- The web page will be translated in Chrome.

For those who use SAFARI as browser, please read here:

<https://support.apple.com/de-de/guide/safari/ibrw646b2ca2/mac>

How to translate your new pattern incl. instructions easily

- Download and save the Ebook.
- Start the DeepL WebApp <https://www.deepl.com/de/translator/files> in your browser.
- Select the tab "**Translate file**" at the top of the screen.
- Click on "**Select file**".
- Now **select the file** to be translated in the file explorer and upload it.
- Confirm selection with "**Open**".
- Then **select the target language**.
- By selecting the language, the file will be uploaded and translated and downloaded automatically.
- Now you can open the translated file and get started.
