PRODUCT OVERVIEW

PurRoof Liquid materials are a solvent-free very low odour 2 part Polyurethane system with a liquid activator, a versatile product for use on new construction and refurbishment projects such as schools. PurRoof should be applied by professional roofers experienced in cold lay wet on wet systems. PurRoof Liquid Systems can be applied directly to a clean surface, *wet on wet is absolutely fine for this system. Can also be applied to a damp surface

KEY USES:

- Ideal for all new build, repair or refurbishment projects
- Flat roofs, balconies, terraces, walkways and podiums
- Complex detailing, up-stands, penetrations and terminations
- Fountains and water features, Wind turbine posts
- Warm roofs, cold roofs, and inverted warm roofs
- Green roofs, brown roofs and living walls
- Internal plant rooms and wet rooms
- Heritage properties and lead replacement
- Waterproofing finlock gutters, valley gutters and drainage channels
- Waterproofing profiled metal roofs
- Overlaying virtually any failed roofing systems e.g. asphalt, mineral felt, single ply, liquid systems.

PURVEIL:

PurVeil 15 95gs is a heavy duty fleece reinforcement, no comparison to the 70gs non-fleece veil. PurVeil can be used on profiled metal or pitched roofs, including standing seams. PurRoof combined with PurVeil forms a totally seamless, reinforced, UV stable, elastomeric membrane. Extremely durable and tear-resistant, it can accommodate structural details and penetrations without the need for additional mechanical fixings. Ideal for new build and roof refurbishment projects.

SURFACE APPLICATION

Substrate guide

Substrate guide	Surface Clean	PurVeil
Bitumen Roof Sheet (No small connections)	x	optional
Bitumen Roof Sheet (With small connections)	√	optional
APP- Bitumen Roof Sheet or Granulated	Test 1st	optional
Asphalt Weathered	√	optional
Plastic/Rubber Sheet EPDM, ECB, PVC, PE, PP, PIB, EVA	Test 1st	optional
Plastic Sheet FPO TPO	√	optional
Fibre Cement Sheets	√	optional
Clinker, Brick, Ground Stone	√	optional
Concrete Screed	√	optional
Polymer modified Concrete PCC	√	optional
Natural Stone	√	optional
Glass Uncoated	Test 1st	x
Zinc	x	x
Copper	x	x
Lead	x	x
Steel (Special Steels, V2A V4A	x	x
Aluminium	x	x
Sterling Board OSB3	x	√
Wood Panels	x	√
Insulating Materials Polystyrene, RockWool, PU)	x	√
GRP	x	optional

SURFACE PREP

The surface must be dry prior to commencing work remove all loose contamination from the substrate such as rust, organic growth, dust and dirt or any other material that would affect bonding. Residual moisture in the first 20mm of the surface should not exceed 5%, where the surface is exceeding this level, Primer should be used to seal the surface prior to work commencing, however this should only be used up to a maximum of 15% residual surface moisture.

WARRANTY

PurVeil 15 reinforcement

USES INCLUDE

- Ideal for all new build, repair or refurbishment projects
- Flat roofs, balconies, terraces, walkways and podiums

SPECIAL FEATURES

Can be used without PurVeil 15 reinforcement for general repairs and overlaying existing roofs *

• Solvent Free • Low Odour • Crack filling • Cold Applied • Breathable membrane

MULTI SUBSTRATE

Bonds to a very wide range of surfaces **

Can be used both externally and internally

ADVANTAGES

Cure Working time:
approx. 30minutes

Rainproof approx: - 2hrs

Solvent free application
perfect for schools & Public
building

KEY FEATURES

Exceptional toughness with
flexural strength • Pour & Roll
System (Wet on Wet)

SPECIFICATION

Colour: Grey

Coverage: 1.5-2 kg/m² 10m² *Approx depending on the surface

Pack size: 15.5kg
